MP	MP	MP	MP

Moves like a real car! The secret is...
 The ability to reproduce the atmosphere of the vehicle that runs on these days.
 The ability to play with them for a long time.

MP	MP	MP	MP	MP	MP

モーターカ
 ジェル
 All...
 The ability to play with them for a long time.

Now with the advent of the new century, what do adults who truly know cars want from a model?
 A faithful representation of the appearance, the body, the details?
 Availability to reproduce the atmosphere of the vehicle that runs on these days?
 Presenting this year's new limited collection, we seek to answer these questions by way of semi-decast models.

MAZDA RX-7 (FC3S/FD3S) 4 MODELS

トミカドリームモータースタート!!

The world's leading toy car company, TOMICA, is the company that has researched and developed the world's most popular toy car, TOMICA, for over 50 years!!

Many TOMICA children's concepts to develop during automobile research. There is a strong interest in implementing these ideas, so in the 21st century, the company decides to make the dreams come true!

At the 2001 Tokyo Motor Show, TOMICA presented its concept car, the Dream Car, which is a car that runs without a combustion engine.

Attendees crowded around and were thinking "Wouldn't it be nice to have a car like that!" TOMICA also presented its concept during the show.

Nissan Motor president has designed a popular concept car. Sometime in the future, there could be cars

running without combustion engine.

Dream car being developed as a product!! Introduced in this catalogue, Magnum Patrailer is such a concept vehicle. As a toy, fun factor is important. As a real automobile, practicality and design are important considerations. From now on, we will produce dream cars.

Using Plarail parts to build railway. 從Plarail組合開始造成鐵路。

Joining Plarail tracks together 組合Plarail路軌的方法

Point 重點

Place the indented part first, insert the extended part into it!
先將凹部放在上面，並將凸部插入凹部。

Assemble the tracks together on top of the bridge foundation.
將路軌放在橋的上蓋裝搭。

There are many kinds of Plarail tracks. Basic construction use straight tracks. For change of direction, use switching track or curve track.

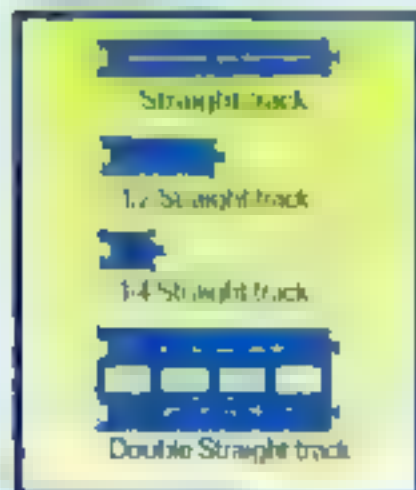

Plarail tracks

Plarail tracks

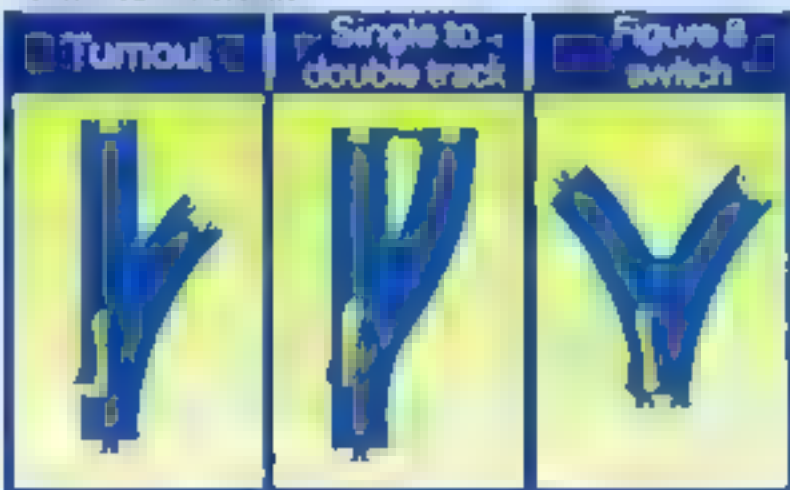

Plarail tracks can be used on both side

Straight tracks 直線路軌

Switching tracks 可改變方向的路軌

Curve tracks 曲線路軌

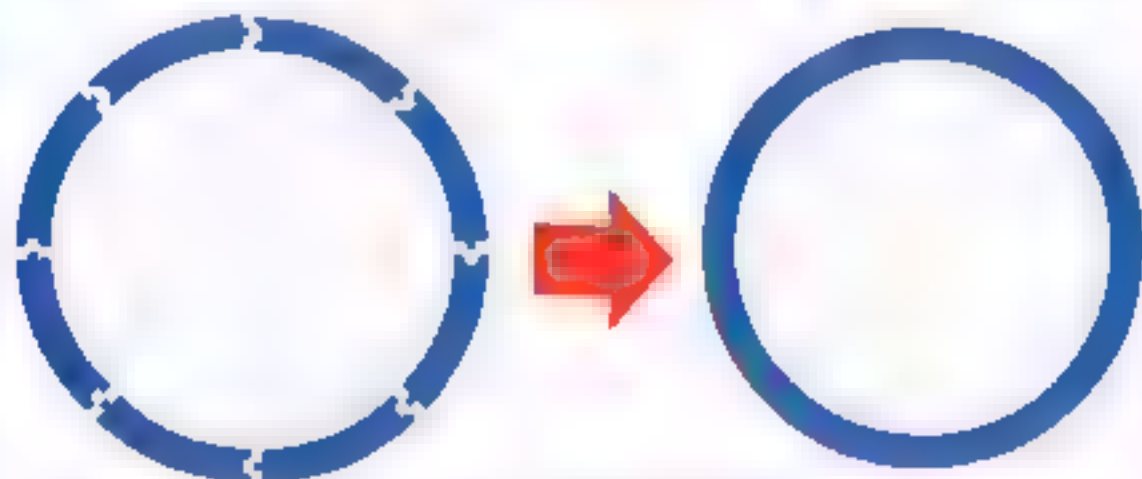

Make the rail layout 做軌道的圖形

Basic 2

First, let's make a circle with 8 curve tracks!

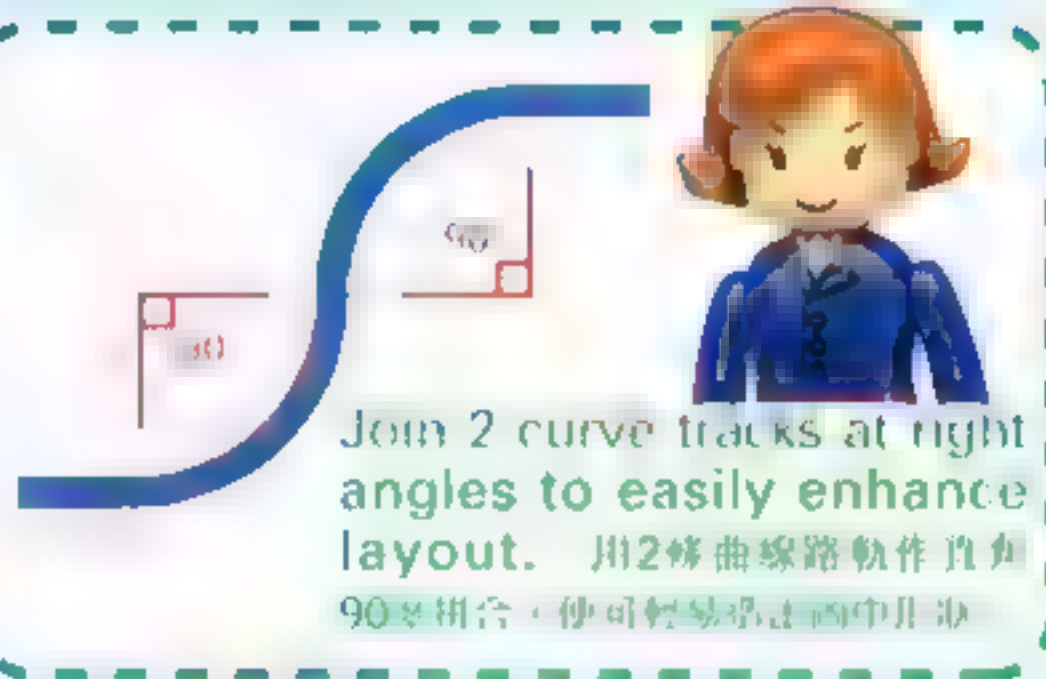

首先，試用8條曲線路軌造成一個圓形！

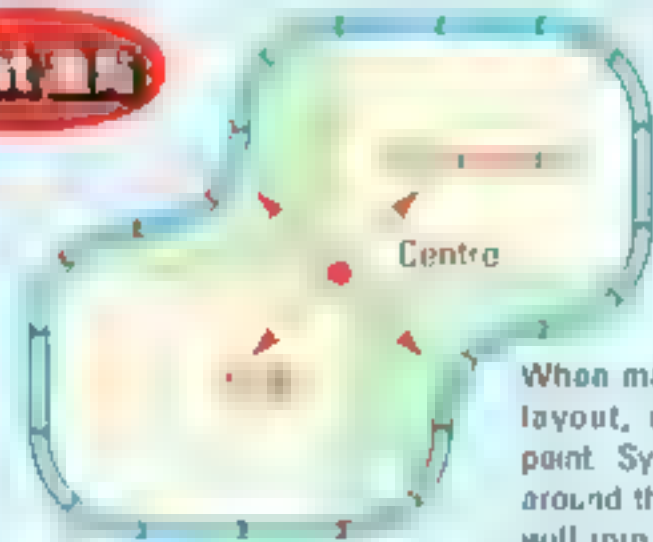

Joining 8 curve tracks together to form a complete circle
8條曲線路軌連起來便可組成一個圓。

Try to make an oval 試造橢圓形

By adding straight tracks, layout

Point 重點

When making a larger layout, use a centre point. Symmetric tracks around the centre point will join up correctly.

Should your layout not align for completion, think of this centre point!
假如圖形不對，可以想一下中心點，在圖中用一條直線連起來，當路軌接上後，便會發現對齊了。

Expand the tracks 把圖形擴大

Master 1

Expand the tracks by simply adding switching tracks.

若加上軌道轉換器，便可簡單地將線路伸延開去。

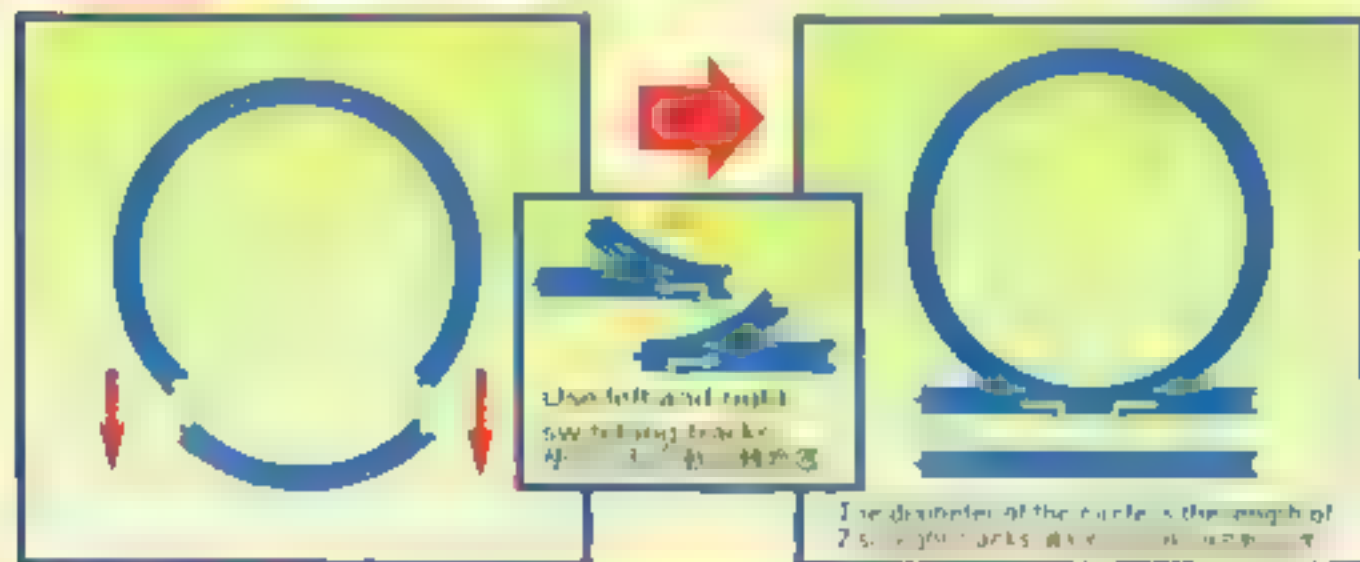

Layout size: 135 x 70 cm

Placed
1 Straight Track 8 pcs 4 Curve Track 14 pcs
Switching Track (L, R) 1 each

Point 重點

Take out 2 curve tracks and replace them with switching tracks 把圖形中的2條曲線軌道取出，放入2條軌道轉換器。

The yellow switch on the switching track changes the direction of train travel

改變黃色薄片位置可讓列車行駛的方向轉換

Adding scenic accessories 加入情景配件

Master 2

Use different scenic accessories to create memorable layouts.

可放入情景配件，使整個佈景模型更加生動吸引。

Plarail has many scenic accessories. Choose the street scenery to make your own street.

有很多情景配件，可让你建立你的私人街道。

Different scenic parts can create different scenery

不同的情景配件可创造出不同的情景

Scenic accessories used in this layout

在此佈景模型出現的情景配件

Put a tunnel over the curve tracks, and let different trains pass through. 在曲線路軌上放一個隧道，讓不同的列車通過。

The train station accessory includes platform and train. The control rod can stop the train. 車站內有車站月台，控制桿可讓列車停止。

Railroad crossing accessory includes father, son and daughter figures. 火車橫道組合包括爸爸、兒子、和女兒共3個的可動人物造型。

The length of 1 straight track is the same of the scenic accessory. Replace one track segment with scenic accessory. 1根直線路軌和情景配件的長度一樣，可換上1根直線路軌並更換1件情景配件。

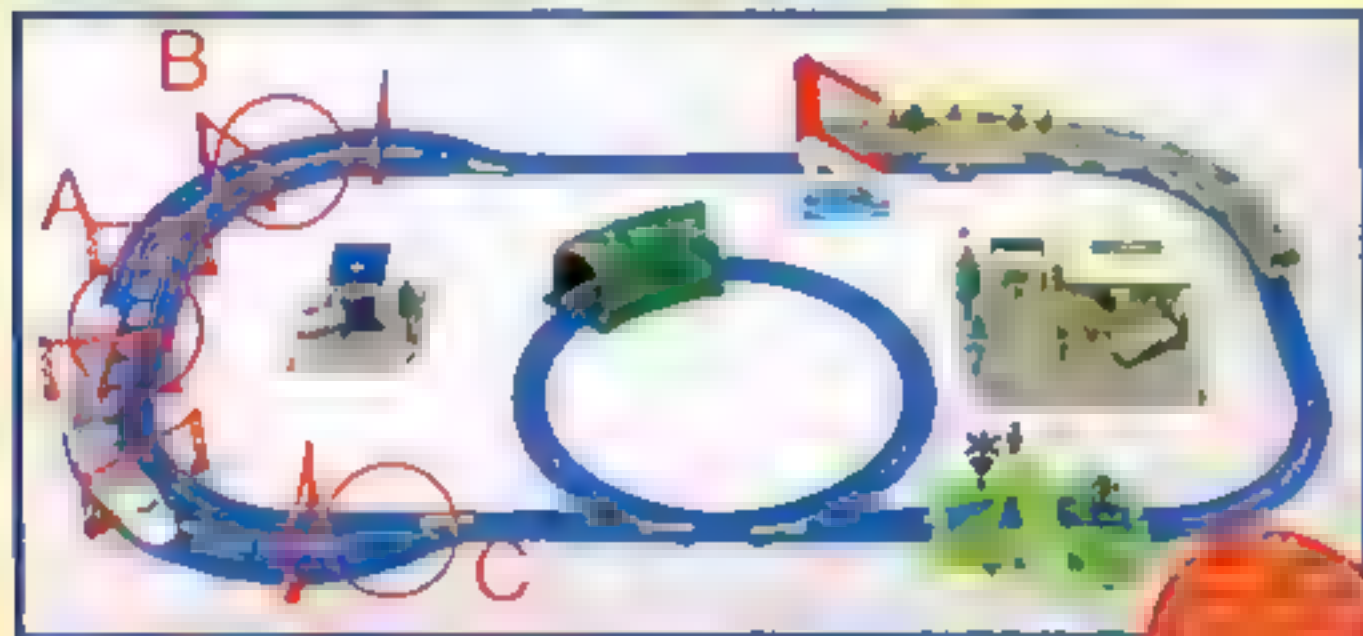

Make complex railroads 做複雜的路線

Master 3

Use double tracks to make the trains run in parallel.

用複線路軌製造出並列行走的路線。

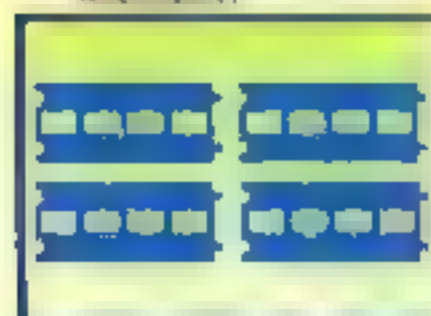

This layout incorporates double tracks.

這個模型鐵路使用了複線路軌。

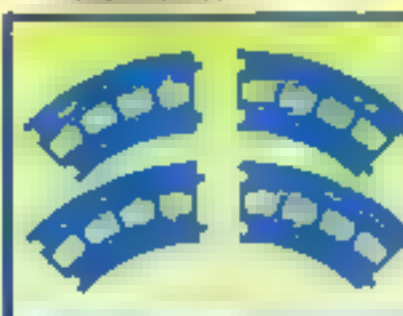

(A) Double Straight Tracks
雙直線路軌

(B) Double Curve Tracks
雙曲線路軌

Single Double Track Switch
單雙軌道轉換

Two sets of straight tracks could make a double straight track.
兩條直線路軌可造成一條複線直線路軌。

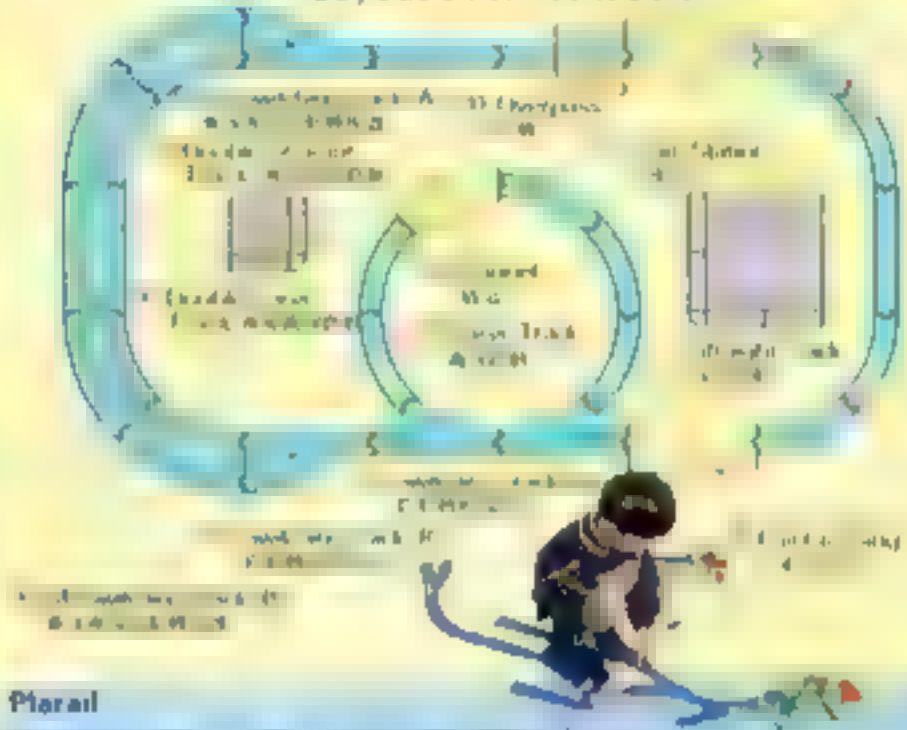

Make complex layout by combining double straight tracks together.
將複線直線路軌組合起來，可造成更多變化的路線。

There are two kinds of single double switching track.
將軌道單邊變為複線的時候，有A及B兩種。

Layout size: 165 x 90 cm

Parallel

Straight Track 1pc	Double Curve Track 4pc	Train Station 1pc	Gas Station 1pc
Curve Track 1pc	Single Double Switch Track 2pc	Train Station 1pc	Gas Station 1pc
Double Straight Track 1pc	Double Curve Track 4pc	Train Station 1pc	Gas Station 1pc
Double Curve Track 4pc	Double Curve Track 4pc	Train Station 1pc	Gas Station 1pc

Tomica Town

Police Station 1 Gas Station 1

Double track allows trains to travel in the same direction together.
Cool!

Build another dimension to your layout 將路軌立體化

Master 4

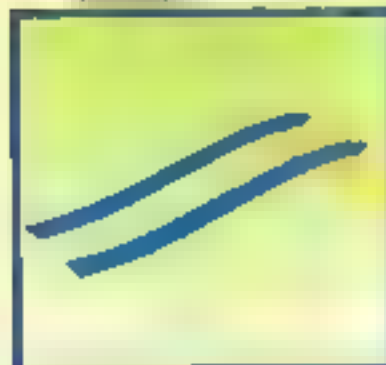

Inclined tracks and bridges add another dimension to the layout, you can also use iron bridge.
用斜坡路軌及橋樑可以使路軌立體起來，也可用鐵橋。

Try to let both trains run together in the double track. If it seems difficult, let one train run within the circle, and the next one could pass through the circle. 2 trains can run together in the double track. 1 train can run in the circle. 2 trains can run together in the double track. 1 train can run in the circle.

This layout uses elevated parts. 這個佈景模型使用了立體化的配件。

(A) Inclined Tracks
斜坡路軌

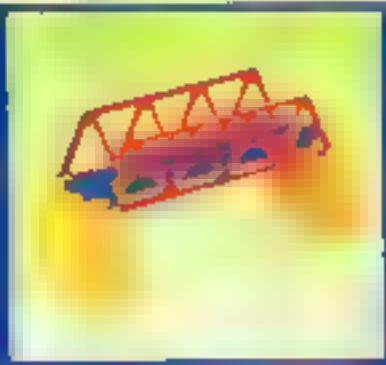

Easily elevate the tracks with inclined tracks. 1 segment of inclined track equals 2 segments of straight track. 利用斜坡路軌容易使路軌立體化。

Bridge girder
橋樑

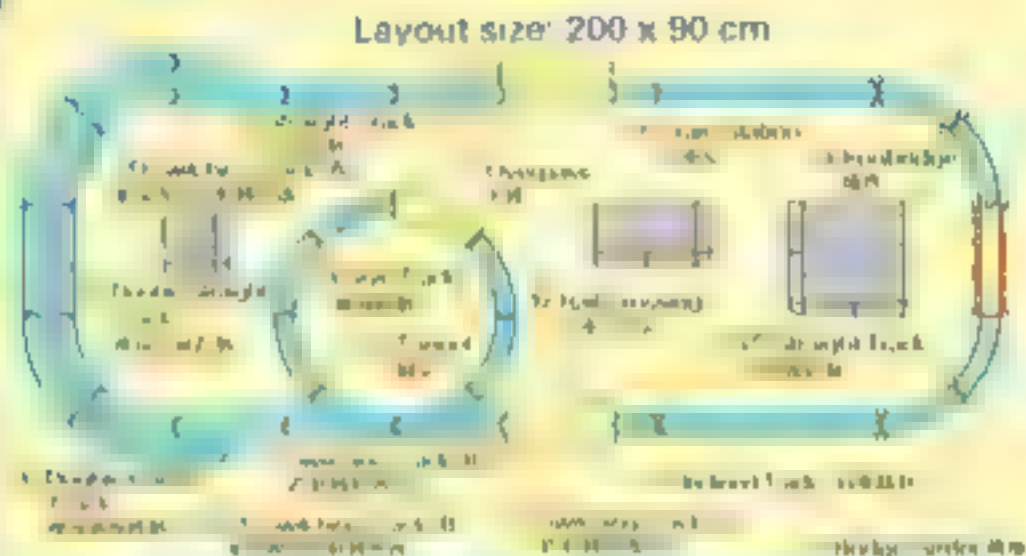

Bridge girder (or similar) is essential to elevated track. 橋樑或類似物是立體化路軌的必需品。

(B) Iron Bridge
鐵橋

Add an iron bridge on an elevated track, and the scenery comes alive. 在立體化路軌上加鐵橋，使佈景更活潑。

Plan:

Double-track	1 set	Double-track	1 set
Single-track	1 set	Single-track	1 set
Inclined track	1 set	Inclined track	1 set
Bridge girder	1 set	Bridge girder	1 set
Iron bridge	1 set	Iron bridge	1 set
Bridge girder	1 set	Bridge girder	1 set

Tomica Town

●Police Station 1 ●Fast Food Shop 1 ●Gas Station 1

Make good use of bridge girder!

好好利用橋樑！

Master level
Layout is complete

Completed! Build more streets in

For expansion, just add more Plarail tracks to allow more streets in Tomica Town.

加入連接道路，伸展Plarail的路線，便可將Tomica 城市進一步擴大。

Plarail

1 Straight Track	50	100cm Track	100	1 Road Crossing	100
2 Curve Track	100	100cm Track (with bridge)	100	1 Station	100
3 Double Straight Track	100	100cm Track (with bridge)	100	100cm Track	100
4 Double Curve Track	100	100cm Track (with bridge)	100	100cm Track	100
5 1/2 Straight Track	100	100cm Track (with bridge)	100	100cm Track	100
6 1/2 Curve Track	100	100cm Track (with bridge)	100	100cm Track	100

Point

Use 1/2 and 1/4 length straight tracks to adjust fitness.

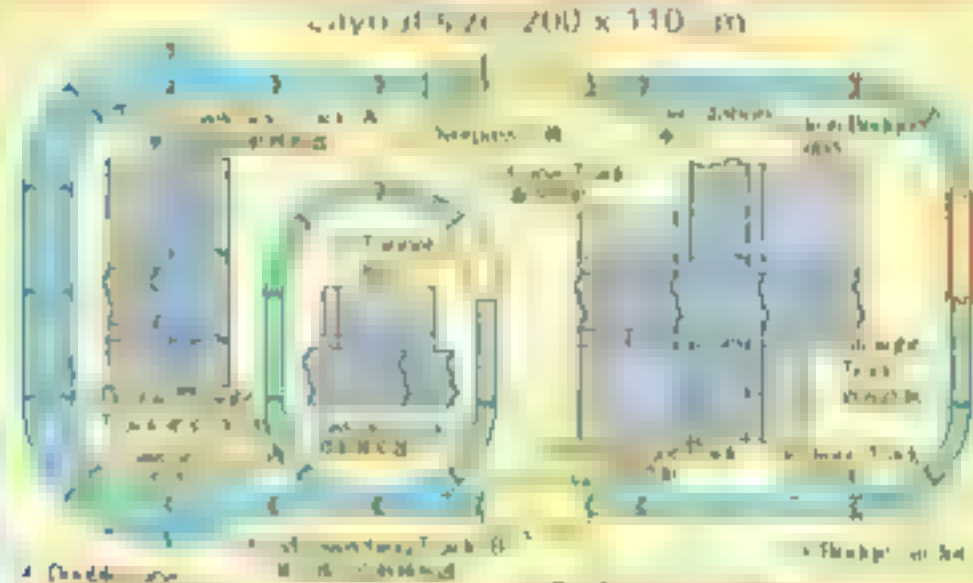

1/2 和 1/4 長度直軌可作調整之用。

Only one size of 1/2 is available for length adjustment only.
只有 1/2 長度直軌可供調整之用。

1/4 length tracks has different connectors, they can be used to connect tracks in different directions.
1/4 長度直軌有不同連接器，可用於不同方向連接軌道。

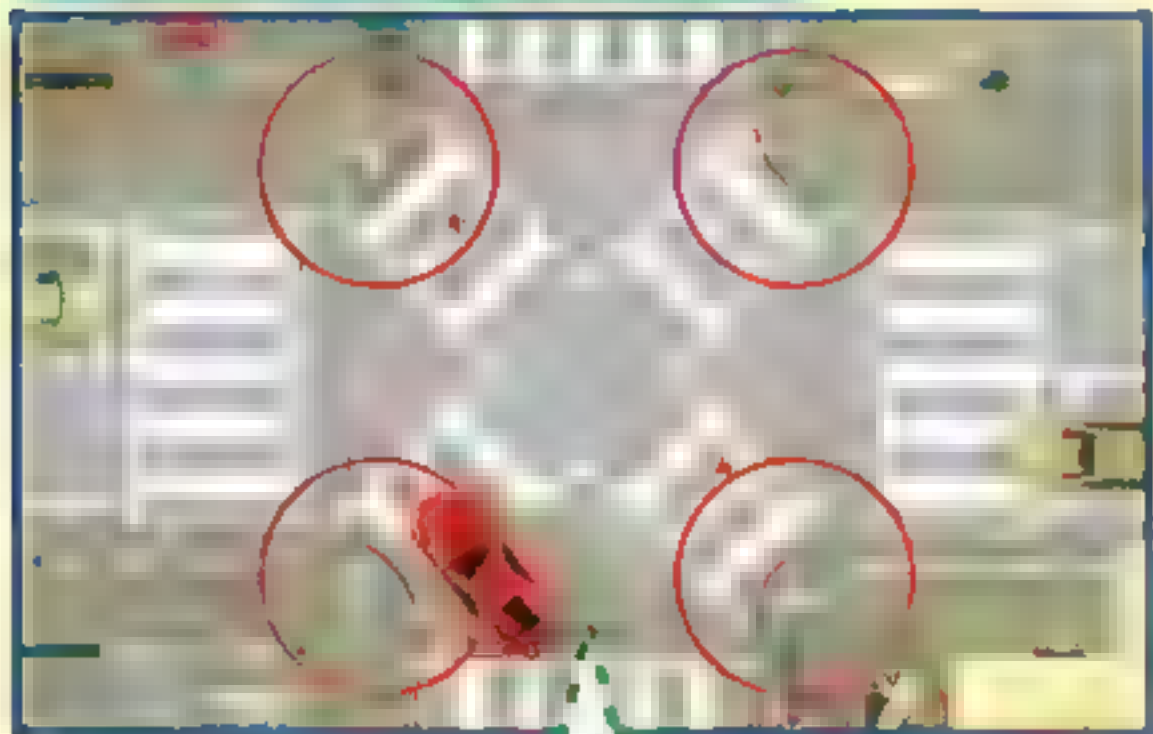

Tomica Town! 完成了! 在Tomica 城市製造更多街道吧!

Master 5

In Tomica Town, you can control the Tomica cars to drive on the streets. 在Tomica 城市內，只有你可控制車輛在街上行走。

Tomica Town Part 1

The round corner of Tomica Town part connects to the round corner of road crossing part.

Point

Various kinds of connecting roads

<p>3 kinds of large road piece with pedestrian crossing. Use at crossing or road junction. (大馬路有行人過路用) 在馬路交叉處或馬路交叉處用。</p>	<p>4 kinds of small road piece, at half the length of large road piece. Use according to the size of Tomica town. (小馬路) 此小馬路有一步，適合Tomica 城市大小用。</p>	<p>2 kinds of large road piece, square shape, same as crossing. (大馬路有2種，其中一種是正方形，可用於馬路交叉處。)</p>
<p>Another kind of road crossing, being used in intersection. (另一種馬路交叉，用在馬路交叉處。)</p>	<p>1 road crossing, at the same length as straight road piece, connected to corner. (1種馬路交叉，此馬路交叉與直馬路一樣長，用在馬路交叉處。)</p>

move on to new challenges!**
掌握了基本，嘗試挑戰更高層次!

Let Bullet train run on elevated

This layout uses the station building to join two decks of tracks. Shinkansen runs on the elevated level, separated from the tracks below, to make sure there is no chance of collision. Add an iron bridge for a more powerful presentation.

✓ 這個型是在中站+環式，下層+2條路軌的圓形，新幹線在最高路軌，上層+兩1條的路軌，有連接，因此不用擔心會有相撞，加上了鐵橋連半整個路軌，令更立體。

Tomica Town, with
Plarail running on
the street level
Shinkansen
running on the
elevated level,
so cool looking!

Tomica 城市配上 Plarail

本路軌上行走，很有即興!

Place your favourite streets in
Tomica Town 將你喜歡的軌道+街道
在 Tomica 城市內吧。

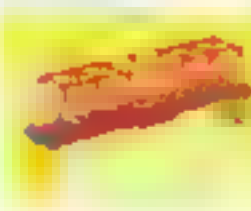

tracks 讓新幹線在高架路軌上行走

Challenge 1

Many trains could enter and exit the station building. Make a large station by putting several station buildings together. 許多列車可以進出車站大樓。把多個車站大樓放在一起，建立一個大車站。

Large iron bridge is twice as long as a straight track, with bridge girders included. 大型鐵橋是直線軌道的兩倍長，包括橋樑樑架。 1. 鐵橋 2. 樑架

Train signal

Connecting track to main line

4. Main Track, 5. 4. 主軌, 5. 4. 主軌

Layout size: 135 x 140 cm

Shinkansen running on elevated tracks can connect to Para. There are also many side active layouts. 新幹線在高架軌道上可以連接 Para。還有許多側面活動佈局。 1. 新幹線 2. 高架軌道 3. 側面活動佈局

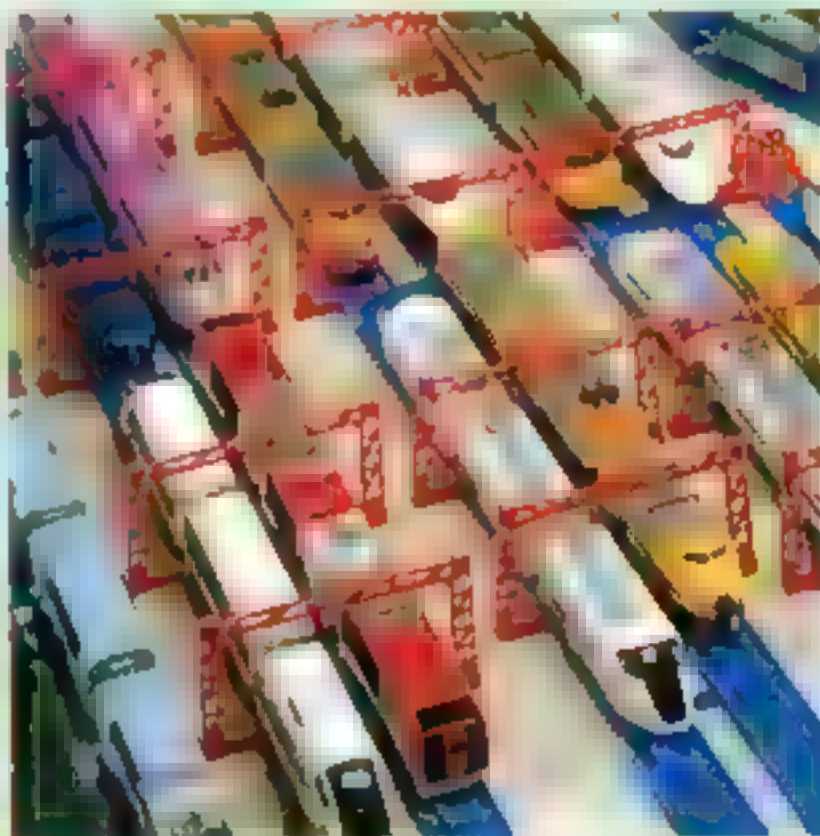

Broad streets in front of the train station. Add Tomica Town and connecting roads to make a shopping street. 車站前面的寬闊街道。添加 Tomica Town 和連接道路，使其成為一條購物街。 1. 車站 2. 寬闊街道 3. Tomica Town 4. 連接道路

Plarail

straight Track	2 pins	station Building	1 pc
curve Track	14 pins	traffic signal	1 pc
Elevated Track	1 pc	Bridge girder	1 pc
switching Track (left)	1 pc	Turned	1 pc
switching Track (right)	1 pc	Turned (left)	1 pc
switching Track (right)	1 pc	Turned (right)	1 pc

● Car Wash	1	● convenience Store	1
● Fast Food Store	1	● Restaurant	1
● Police Station	1	● Fast Food Store	1
● Car Park	1	● Connecting Roads	1

**Familiar with the basics,
move on to new challenges!**

掌握了基本，嘗試挑戰更高層次!

Use new switching
track and stop rail
to build a big
garage

Grand transportation collection!!

活動交通大匯合!!

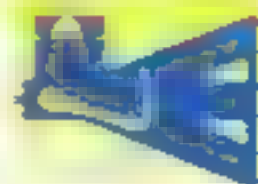

This design allows cargo trains to select the route to go. Choose the outer track to go through the iron bridge, or the inner track to the train wash. The large garage can hold many trains. Trains such as EH500 or EF210 are very suitable to that

此設計可讓貨車選擇行車路線。選擇外軌可經過鐵橋，或內軌可前往洗車房。大型車房可容納多列火車。EH500或EF210等貨車非常適合此設計。

Try a new switching track and you
can split the rail in three directions
within a very small space, very
convenient to use in a garage.

嘗試新式轉軌，你可以在極小的空間內
將鐵軌分為三個方向，非常適合在車房
使用。

There are so many
trains waiting in the
garage. Which one
should move first?

車房內有這麼多列火車在等待，
哪一列應該先移動呢？

Let's go cargo trains!

貨物列車開行吧!

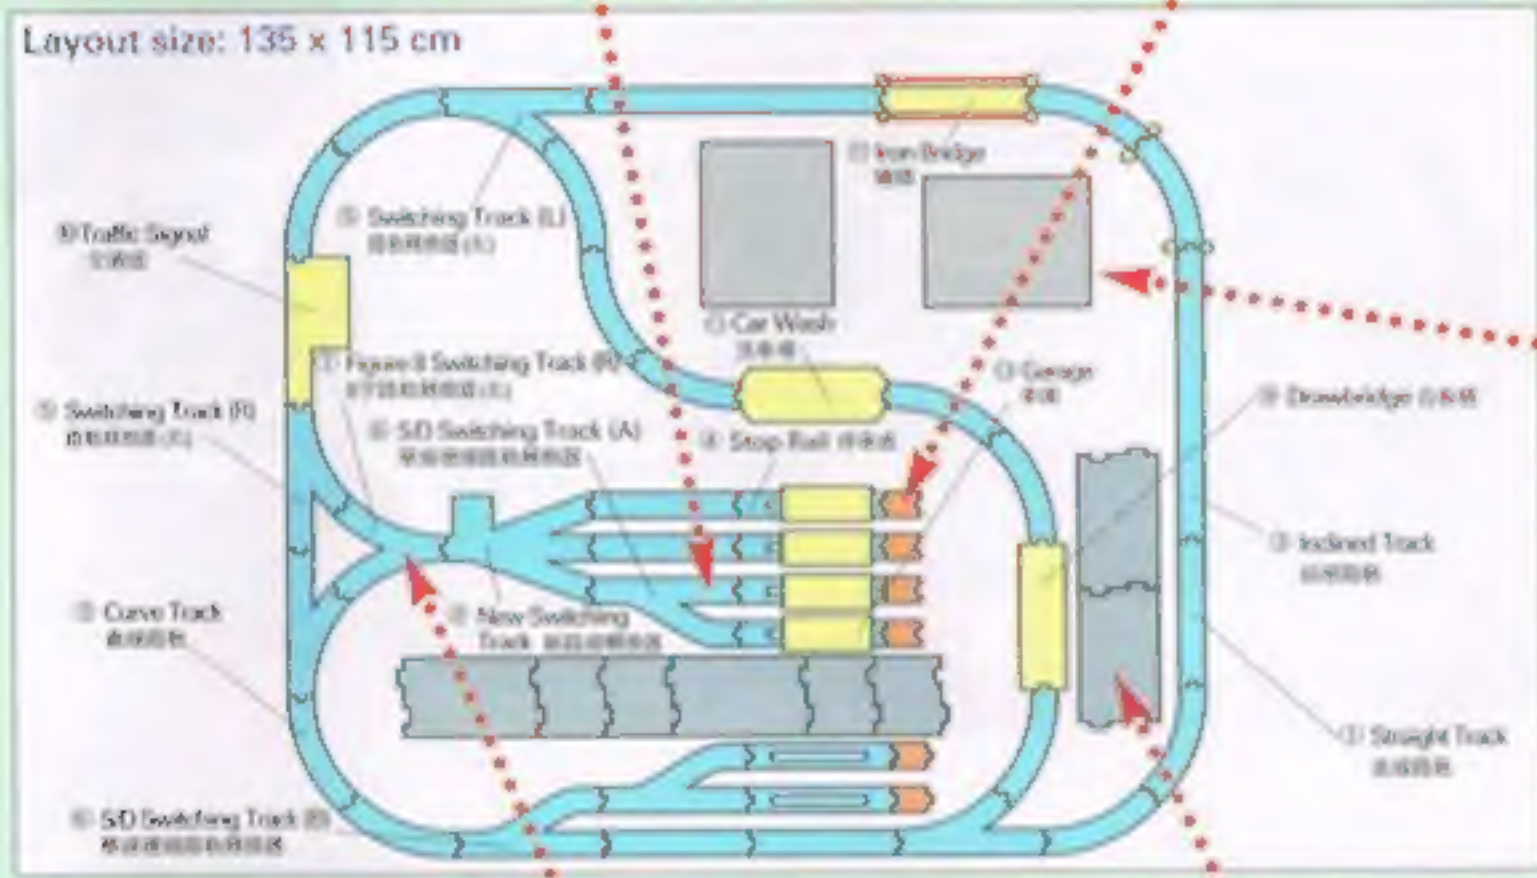

Challenge 2

(A)  **(B)** 

Expand the garage easily with single/double switching track.
用單線/雙線路軌轉換器可擴大車庫。

Stop rail uses a control rod to make trains go or stop.
停車或利用推桿桿，能夠控制列車停止或前進。

Plan list

① Straight Track	10pcs	⑦ Figure 8 Switching Track (R)	1pc
② Curve Track	14pcs	⑧ New Switching Track	1pc
③ Inclined Track	1set	⑨ Drawbridge	1pc
④ Stop Rail	6pcs	⑩ Traffic Signal	1pc
⑤ Switching Track (L+R)	2pcs each	⑪ Car Wash	1pc
⑥ Single/Double Switching Track (A+B)	3pcs	⑫ Iron Bridge	1 set
	(A: 1pc, B: 2pc)	⑬ Garage	3pcs

Tonika Town

● Action Construction Site... 1 ● Connecting Roads... 1set

Action
construction site
has heavy duty
moving crane.
建設工地可用起重
機搬運泥水。

Loop Point Rail with curve tracks, can be used to make left and right turning tracks.
用8字型路軌轉換器，再加上曲線路軌一組，便可將路線分向左右兩邊。有左及右兩款。

(L)  **(R)** 

You can place construction vehicles on the connecting roads and expand the roads later.
連接道路上可放置工程車輛，慢慢可伸延道路。

**Familiar with the basics,
move on to new challenges!**
掌握了基本，嘗試挑戰更高層次！

Attempt a large scale scenery with

Motor Tomica and Plarail can run simultaneously on the freeway system. With automatic rail crossing, there is no worry of collision between trains and cars. In the open spaces, use Tomica Town accessories to add streets. Plarails could run over long period of time. 在高速公路上，電動Tomica和Plarail火車一起走動。有了自動調節的交匯處，汽車及火車是不會相撞的。在空曠的地方可用Tomica城市製造街道。Plarail火車能夠長時間在路路上運行。

Plarail and Motor Tomica running together with road and rail crossing. Lots of fun.

Plarail和電動Tomica一起在交差道路及軌道上行駛，很有趣啊！

Automatic rail crossing stops Motor Tomica, let train passes through, then resume the traffic. 使用自動的「汽車火車交匯處」，電動Tomica會自動停止，讓火車通過後再自動前進。

The road section of Motor Tomica could be constructed with many combination of roads. 電動Tomica的道路部份亦可自由組合成不同的道路。

streets, freeways and roads 試造出大型的街道及高速公路

Challenge 3

Curve elevated track could make an elevated layout in small space.
曲線軌道只需用細少的地方，便可造出立體的分別。

Motor Tomica road parts

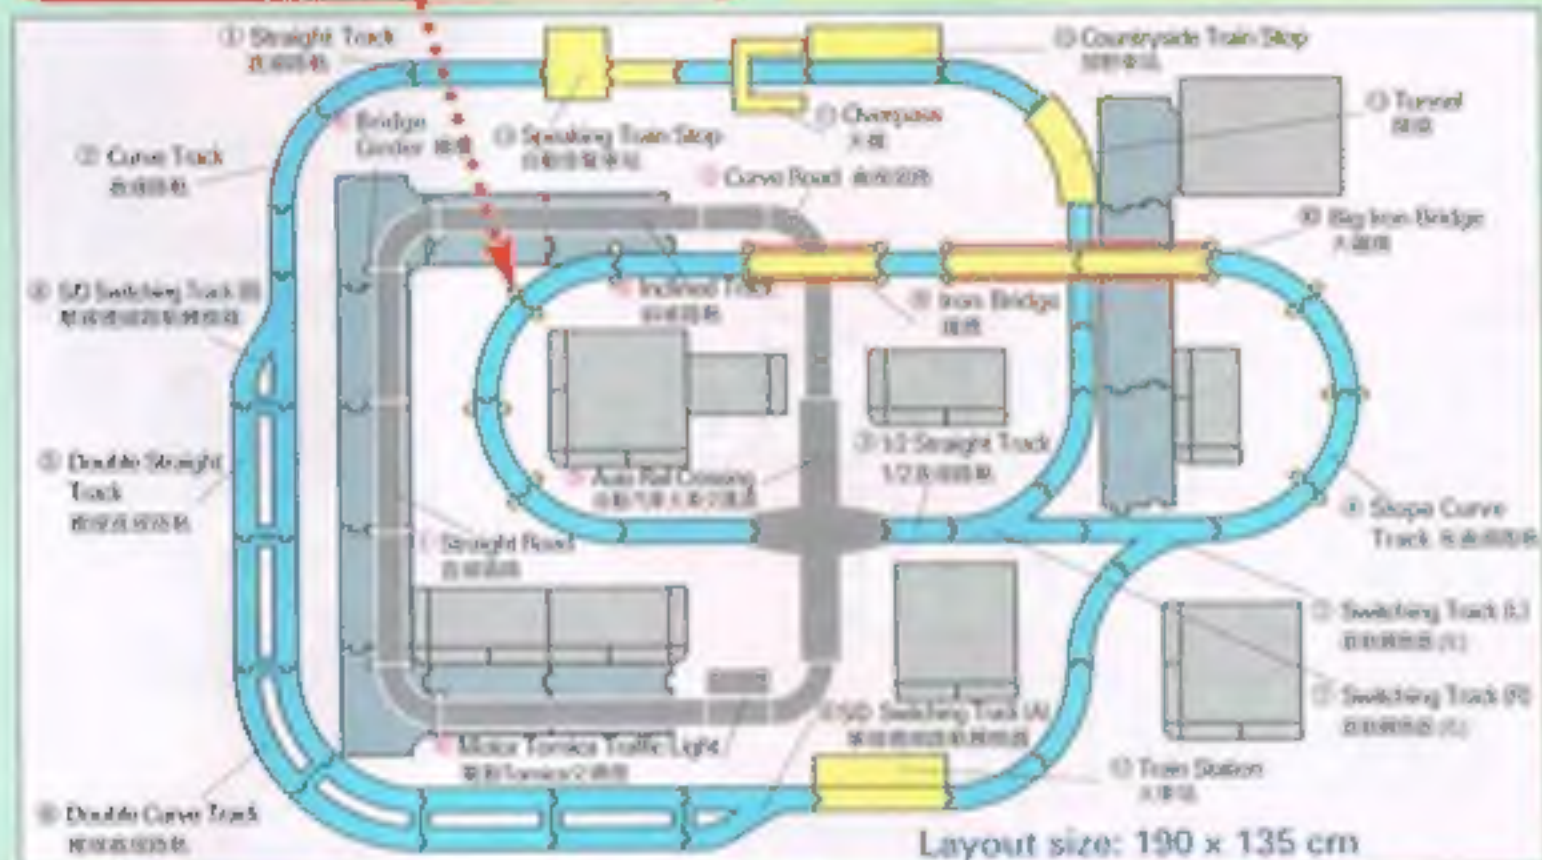

- | | | | |
|--------------------|------|--------------------------------------|--------------------------------------|
| ① Straight Road 直路 | 4pcs | ⑤ Bridge Girders 橋樑 | 6pcs |
| ② Curve Road 曲路 | 4pcs | ⑥ Auto Rail Crossing 自動火車路口 | 1pc |
| ③ Slope 斜坡 | 2pcs | ⑦ Motor Tomica Traffic Light 自動火車交通燈 | 1pc (use 1/2 Straight Road included) |

Plarail

- | | | | |
|---|----------|--------------------------------|--|
| ① Straight Track 直軌 | 6pcs | ⑩ Iron Bridge 鐵橋 | 1set (1 pc of Straight Track + 2 pcs of Bridge Girders) |
| ② Curve Track 曲軌 | 8pcs | ⑪ Big Iron Bridge 大鐵橋 | 1set (2 pcs of Straight Track + 3 pcs of Bridge Girders) |
| ③ 1/2 Straight Track 1/2 直軌 | 4pcs | ⑫ Overpass 立交橋 | 1pc |
| ④ Curve Track 曲軌 | 1set | ⑬ Train Station 火車站 | 1pc |
